A much deserved facelift

By: [Anne Braly](#)

Red Lobster's been on the seafood scene for decades, and it seems many of its restaurants have seen better days. Wasn't too long ago I was at the Northgate location and saw the wear and tear the restaurant has experienced. Not surprising as every single one of these eateries is packed every time I visit or drive by.

Now, all the Red Lobster restaurants have been given a facelift of understated elegance. It's not screaming "FACELIFT" in your face. It's the little touches, such as new railings, that set things off. And while there, try that new Garlic Cream Jumbo Shrimp. It looks outstanding.
